

COLOUR OF SOUND INSTITUTE IN DUBLIN

About Us:

Hello. I'm Tony Nec, the Principle of the Colour of Sound Institute and a member of the International Sound Healers' Association.

I'm a holistic therapist, coach, speaker and trainer with over 20 years' experience.

My passion is to help people deal with their health issues and create wellness through therapy, personal development, self-transformation and inner growth, drawing on the best of ancient wisdom and modern science.

The Institute was founded in 2003. Since then we've run live courses in sound therapy with students from many countries.

We've run a whole range of courses and workshops from 1 hour taster sessions through to professional qualifications accredited by the British Complementary Medicine Association.

COLOUR OF SOUND INSTITUTE

Discover The Power Of Sound!

Many leading scientists now understand what the ancient mystics have known for thousands of years – the true nature of everything in life is made up of energy waves surrounded by space in which everything is connected in a unifying Field.

Every form has a unique vibrational frequency. Through the use of sound as harmonic resonance, coupled with deliberate intent and positive beliefs, it is possible to alter the vibrational properties of cells and facilitate our natural healing potential to create joyous lives rich in peace, harmony and wellness.

“The music of the universe is a cosmic symphony that embraces all the waves of sound audible and inaudible, all the waves of light visible and invisible, all the waves of gravity, felt and unfelt, and all the waves of atoms explicit and implicit. Thus it begins to look more and more as if our universe is constructed not of matter but of music.”

Donald Hatch Andrews, PhD. Chemist in “The Symphony of Life”
